### Plans of Safe Care Learning Modules

Is a five-part series on Plans of Safe Care (POSC) for infants born with and identified as affected by substance abuse or withdrawal symptoms resulting from prenatal drug exposure, fetal alcohol spectrum disorder (FASD), or their affected family or caregiver. The series is intended to guide state, tribal, and local collaborative partners in improving their systems and services for infants affected by prenatal substance exposure and their families. These modules include the following:

- **Module 1: Preparing for Plan of Safe Care Implementation**
- **Module 2: Collaborative Partnerships for Plans of Safe Care**
- **Module 3: Determining Who Needs a Plan of Safe Care**
- **Module 4: Implementing and Monitoring Plans of Safe Care**
- **Module 5: Overseeing State Plans of Safe Care Systems and Reporting Data**

### Tribal Family Wellness Plan Learning Modules

Prepared in collaboration with the Tribal Law and Policy Institute. Guides Tribally driven collaboratives seeking to: 1) reduce the effects of substance abuse on pregnant and parenting families, 2) improve systems and services to reduce prenatal substance exposure, and 3) prevent the separation of families, and support infant and family wellness. Modules include:

- **Module 1: Planning Your Program**
- **Module 2: Establishing Collaborative Partnerships**
- **Module 3: Responding to Infants and Families Affected by Substance Exposure**
- **Module 4: Implementing and Monitoring Family Wellness Plan**

### Tapping Tribal Wisdom: Providing Collaborative Care for Native Pregnant Women with Substance Use Disorders and Their Infants

Provides information from listening sessions with five Tribes. All received funding from the Minnesota Health Care Administration’s Integrated Care for High-Risk Pregnant Women to help with the collaborative care models these Tribes implemented when working with pregnant American Indian women and their families.

Describes what worked well when developing and sustaining collaborative approaches, offers recommendations for next steps in achieving improved outcomes, and details what support or resources are most useful to Tribes.

*This document uses the term “people” to be inclusive of women, nonbinary, transgender or non-conforming individuals experiencing pregnancy or in a parenting role.*
### How States Serve Infants and Their Families Affected by Prenatal Substance Exposure Series and Learning Exchanges

Highlights states’ approaches to serving infants and their families affected by prenatal substance exposure. The briefs are derived from NCSACW’s review of states’ Annual Progress and Services Reports (APSRs) pertaining to Section 503 “Infant Plan of Safe Care” of the Child Abuse and Prevention Treatment Act (CAPTA) and years of practice-based experience providing technical assistance (TA) to support systems-level policy efforts and practice-level innovations to improve outcomes for these infants and families. Each brief is accompanied by a Learning Exchange webinar hosted by NCSACW.

- **Brief 1: Identification and Notification**
  - [Learning Exchange: Identification and Notification](#)
- **Brief 2: Plans of Safe Care Data and Monitoring**
  - [Learning Exchange: Plans of Safe Care Data and Monitoring](#)
- **Brief 3: Lessons from Implementation of Plans of Safe Care**
  - [Learning Exchange: Lessons from Implementation of Plans of Safe Care](#)

### Understanding Fetal Alcohol Spectrum Disorders: Child Welfare Practice Tips

Provides an overview of fetal alcohol spectrum disorders (FASDs), the effect of FASD on child development, FASD treatment, and child welfare practice strategies to support infants, children, and families with a family-centered approach.

### Implementing a Family-Centered Approach Modules

Focuses on implementing a family-centered approach. Designed for state-, county-, and agency-level collaborative partners working together to improve systems, services, and outcomes for children and families affected by SUDs. The modules include:

- **Module 1: Overview of a Family-Centered Approach and Its Effectiveness**
- **Module 2: On the Ground—Family-Centered Practice**
- **Module 3: Collaboration to Support Family-Centered Practices at the County and State Level**

### Disrupting Stigma: How Understanding, Empathy, and Connection Can Improve Outcomes for Families Affected by Substance Use and Mental Disorders

Supports cross-system collaborative teams in their work to reduce stigma in interactions, expectations, and policies affecting families. It provides several strategies to fight stigma and facilitate engagement with parents and family members affected by SUDs.
Key Considerations for Applying an Equity Lens to Collaborative Practice

Enables collaborative teams to formally assess existing policies to determine if and how they contribute to disproportionate and disparate outcomes for families being served. By working through the “Questions to Consider,” teams begin applying an equity lens to collaborative policies and practices. Also serves as a companion to the Comprehensive Framework to Improve Outcomes for Families Affected by Substance Use Disorders and Child Welfare Involvement. CCFF developed the framework as a set of proven strategies to improve outcomes with equity for all children, parents, and families affected by trauma, substance use, and other mental disorders.

Engaging Parents and Youths with Lived Experience

Outlines key strategies collaboratives should consider when recruiting and engaging adults and youths with lived experience who were involved with the child welfare system due to a substance use disorder (SUD) or other mental health challenge. Also included are resources and links to ensure collaboratives have the necessary information to support meaningful partnerships.

Understanding Substance Use Disorder Treatment: A Resource Guide for Professionals Referring to Treatment

Offers those professionals referring parents to SUD treatment with a fundamental understanding of treatment. Includes a list of questions child welfare or court staff can ask treatment providers to ensure staff make effective linkages. Professionals can then make informed referral decisions for services that meet the family’s needs.

Building Collaborative Capacity Series: Module 5 – Frontline Collaborative Efforts: Developing Screening Protocols to Identify Parental Substance Use Disorders and Related Child and Family Needs

Provides an overview of the screening tools and processes that child welfare, substance use treatment, health care, and other community-based agencies can use to identify parental SUDs and related challenges faced by children and families. Describes the key steps collaborative teams can take to develop a comprehensive screening protocol.

Child Welfare Practice Tips Series

Highlights important considerations for child welfare professionals to understand as they support families affected by SUDs. The series includes:

- Understanding Engagement of Families Affected by Substance Use Disorders
- Understanding Substance Use Disorders: What Child Welfare Staff Need to Know
- Understanding Screening and Assessment of Substance Use Disorders
- Identifying Safety and Protective Capacities for Families with Parental Substance Use Disorders and Child Welfare Involvement

<thead>
<tr>
<th>Section Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Infants with Prenatal Substance Exposure and their Families: Five Points of Family Intervention</strong></td>
<td>Enables collaborative teams to learn about the <em>Five Points of Family Intervention</em> and identify major points in time in which their agencies can improve outcomes for infants with prenatal substance exposure (IPSE), pregnant and parenting people with SUDs, and their families. Provides examples of policy and practice strategies at each of the intervention points that child welfare, substance use treatment, health care, and other community agencies can employ to effectively serve this population.</td>
</tr>
<tr>
<td><strong>On the Ground: How States are Addressing Plans of Safe Care for Infants with Prenatal Substance Exposure and Their Families</strong></td>
<td>Provides on-the-ground examples from states that have implemented comprehensive approaches to POSC for IPSE, their families, and caregivers. These concrete examples help states and agencies consider practice and policy systems change to best serve these families in their own communities.</td>
</tr>
<tr>
<td><strong>A Collaborative Approach to the Treatment of Pregnant Women with Opioid Use Disorders</strong></td>
<td>Offers best practices to states, Tribes, and local communities on collaborative treatment approaches for pregnant women with opioid use disorders (OUDs), including medication-assisted treatment (MAT). Also includes an in-depth case study and a guide for collaborative planning including needs and gap analysis tools for priority setting and action planning.</td>
</tr>
<tr>
<td><strong>In-Depth Technical Assistance Program Description</strong></td>
<td>Provides an overview of NCSACW’s IDTA program, which has been provided to 26 unique sites from 2003-2019. Describes the IDTA program model including the phases of the IDTA model, the role of the IDTA change liaison, IDTA’s foundational frameworks, and key lessons of successful collaboration.</td>
</tr>
<tr>
<td><strong>In-Depth Technical Assistance: Infants with Prenatal Substance Exposure</strong></td>
<td>Provides an overview of the In-Depth Technical Assistance (IDTA) program for IPSE and their families. It describes the work of 11 states that have received IDTA since 2014 or are currently receiving IDTA. Highlights state teams’ efforts to identify barriers and challenges in engaging families affected by prenatal substance exposure, as well as states’ efforts to develop strategies to improve outcomes for pregnant and postpartum persons with OUDs, IPSE, and their families. The states identified key lessons of successful collaboration to improve policy and practice.</td>

<tr>
<td>----------------</td>
<td>----------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Medication-Assisted Treatment: A Primer for Judicial Professionals</strong>&lt;br&gt;Serving Parents and Children Affected by Substance use Disorders</td>
<td>Offers information to judicial professionals serving parents and children affected by OUDs. An overview of MAT includes the benefits and risks, barriers to treatment, language considerations, and the importance of collaboration. Highlights the unique needs of special populations, including the use of MAT during pregnancy, and MAT for parents involved in the child welfare system—and those with co-occurring disorders.</td>
</tr>
<tr>
<td><strong>Medication-Assisted Treatment in the Courtroom: A Bench Card for Judicial Professionals</strong>&lt;br&gt;Serving Parents and Children Affected by Substance use Disorders</td>
<td>Provides MAT-related information to judicial professionals and their collaborative partners serving families affected by OUDs. Also included: an overview of MAT, information on frequently used medications, questions to facilitate discussions with court participants, and links to additional resources with a focus on special populations receiving MAT.</td>
</tr>
<tr>
<td><strong>Plans of Safe Care – What your Multidisciplinary Team Needs to Know</strong></td>
<td>Highlights the importance of a collaborative approach to guiding pregnant people with SUDs into effective treatment while describing strategies for multidisciplinary teams to plan for the safe care of infants and families.</td>
</tr>
<tr>
<td><strong>Model Examples for Plan of Safe Care Implementation: Live Panel Discussion</strong></td>
<td>Features state and county child welfare professionals—along with health care and SUD representatives—who discuss their work developing and implementing POSC.</td>
</tr>
<tr>
<td><strong>NCSACW Online Tutorials</strong></td>
<td>Helps substance use treatment, child welfare, and legal professionals increase their knowledge and skills to work with families affected by SUDs, while building cross-system collaboration across the various agencies serving them.</td>

# Child Welfare Training Toolkit

Provides facilitators with an array of resources to train staff on how to work with families affected by substance use who are also involved with the child welfare system. Works as a 1-day training or separate 2-hour training modules (which includes a PowerPoint presentation, Facilitator’s Guide, and Resource List). The 10 modules on essential topics for child welfare practice include:

- **Module 1:** Understanding the Multiple Needs of Families Involved with the Child Welfare System
- **Module 2:** Understanding Substance Use Disorders, Treatment, and Recovery
- **Module 3:** Understanding Co-Occurring Substance Use Disorders, Mental Health/Trauma, and Domestic Violence
- **Module 4:** Engagement and Intervention with Parents Affected by Substance Use Disorders and Mental Health/Trauma
- **Module 5:** Case Planning, Family Strengthening, and Planning for Safety for Families with a Substance Use Disorder
- **Module 6:** Understanding the Needs of Children of Parents with Substance Use or Co-Occurring Disorders
- **Module 7:** Collaborating to Serve Parents with Substance Use Disorders
- **Special Topic:** Considerations for Families in the Child Welfare System Affected by Methamphetamine
- **Special Topic:** Considerations for Families in the Child Welfare System Affected by Opioids
- **Special Topic:** Understanding Prenatal Substance Exposure and Child Welfare Implications
